

NEW ORGANIC PROTEIN

PLANTTECH

When only the best will do!

TurfStarr 100™

8-0-4 Natural/Organic

TurfStarr 100™ 8-0-4 is a combination feather meal, meat and bone meal, mined potash granular fertilizer, chelated with Hydrolyzed Microbial Protein (HMP), or lipo-protein.

Lipo-protein is new technology developed exclusively by PlanTTech for the green industry. Extremely rich in amino acids, the HMP has the unique capacity to mobilize essential mineral nutrients, increasing their availability and promoting efficient root uptake. TurfStarr 100 also contains polysaccharides designed to maximize soil microbial activity in conjunction with the lipo-protein. Pure humate has also been added to further help with the mobilization of nutrients into the turf. TurfStarr is an efficient 100% organic fertilizer that is now available for all turf types.

- **Chelated with Hydrolyzed Microbial Protein**
- **Efficient and Affordable**
- **Will not burn, even in mid summer**
- **Can be applied on all turf types**
- **High nutrient availability verses similar products**
- **No Manure or Sewerage sludge**
- **No Odor**

Suggested application rates

One 50 lb. bag will cover 5,000-7,000 sq. ft. Duration will depend on the application, but because it is so efficient, we suggest cutting down the rate by 20% of similar meal fertilizers.

Guaranteed Analysis

| | |
|--|-------|
| Total Nitrogen (N) | 8.00% |
| 0.50% Water Soluble Organic Nitrogen | |
| 7.50% Water Insoluble Organic Nitrogen | |
| Available Phosphate (P ₂ O ₅) | 0.55% |
| Soluble Potash (K ₂ O) | 4.00% |

Derived from hydrolyzed microbial protein, feather meal, sulfate of potash, bentonite and molasses.
