

GREEN WITHOUT GROWTH

PLANTTECH
When only the best will do!

Lo-Gro™

6-0-0 + 14% Fe

Lo-Gro™ 6-0-0 represents a brand new concept in turf maintenance; Lo-Gro is an Iron humate combination fertilizer recommended for a “green without growth” response.

The humate fraction will allow proper chelation and availability of iron and other nutrients, in addition to providing substantial turf green-up. Lo-Gro provides an ideal choice for summer applications, when limited nitrogen and mowing are desired. Lo-Gro is unique to the industry while dust and odor free.

- **New concept and technology for lawn and turf care**
- **Sustained turf color response**
- **Chelated with humate**
- **Zero burn potential**
- **Compliments existing balanced fertilizer programs**
- **Ideal for all types of turf**

Suggested application rates

One 50 lb. bag will cover between 5,000 to 7,000 sq. ft. depending on the depth of color and the duration required.
